A HISTORY OF CAMPAIGNS THAT SHIFTED BEHAVIOR

Making a new behavior feel normal

How 35 campaigns were built: the message, the delivery, the next step, and the evidence.

1929 — 2022

“Life of the Party” poster on the Cheers set, c. 1989 — Harvard Chan CHC

THE REFERENCE CASE · 1988

One person stays sober and drives.

By 1991, 37% of Americans said they had been a designated driver.

Harvard got the “designated driver” written into prime-time TV.

WHAT THIS IS

35 deliberate attempts to make a new behavior feel normal.

11

Public campaigns

Smokey Bear, Click It or Ticket, truth

21

Stories

Behaviors written into dramas people already followed

2

Community commitments

Tostan in Senegal, SASA! in Uganda

1

Peer comparison

Opower energy reports

1929 to 2022

THE TOPICS

What they tried to change

01 Drunk driving, seat belts, litter

02 Smoking and exercise

03 Family planning, HIV, literacy

04 Child marriage and domestic violence

SIX THEMES

What the campaigns that spread had in common

01

Ask for one specific action.

A small, named role people can adopt.

Designated driver · “Squash it” · Buckle up

02

Put it inside stories people already follow.

Works when the choice drives the main plot.

Sabido telenovelas · Soul City · MTV Shuga

03

Tie it to an identity people want.

Patriotism, state pride, independence, friendship.

Women in War Jobs · Texas · truth

04

Make the new expectation visible.

People change when they see others have.

Tostan · Opower · This Girl Can

05

Back the message with something real.

A real consequence or a real next step.

Click It or Ticket · Rap-It-Up · East Los High

06

Repeat for years.

Familiar through sheer exposure.

Smokey Bear · Vince and Larry · Meena

CONCLUSIONS

What the evidence shows

01

Fame and proof rarely coincide.

The best-known campaigns show recognition, not changed behavior.

02

The strongest results pair a message with a structure.

SASA!, Opower, and MTV Shuga.

03

Stories reach millions. Results are mixed.

Gains after MTV Shuga and Twende na Wakati; no clear effect from Hum Log.

04

The method has no built-in values.

The techniques that normalized designated drivers also normalized women’s smoking.

FOR A NEW CAMPAIGN

What the cases suggest

01 Name one concrete role.

02 Place it in stories and channels people trust.

03 Connect it to a real service or consequence.

04 Make adoption visible to peers.

05 Plan the evaluation before launch.

Torches of Freedom

THE CHANGE THEY SOUGHT

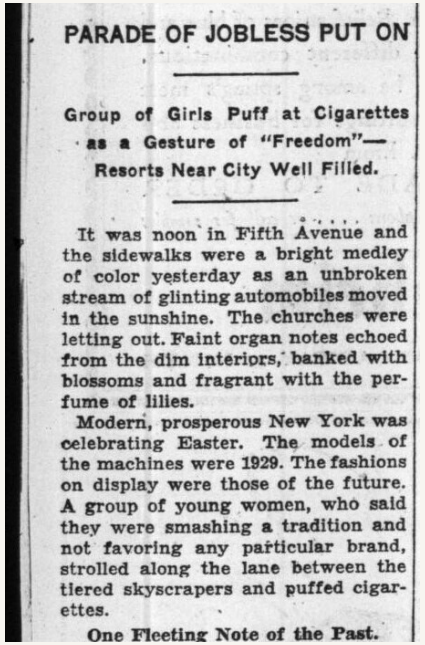

OLD EXPECTATION	Women smoking on the street drew disapproval
NEW INVITATION	Public smoking could signal independence

HOW THEY BUILT IT

01 A tobacco company hired Edward Bernays to stage an Easter parade moment.

02 About ten young women smoked on Fifth Avenue during the parade; press coverage was arranged.

03 Newspaper coverage carried the equality framing beyond the staged event.

PARADE OF JOBLESS PUT ON

Group of Girls Puff at Cigarettes as a Gesture of "Freedom"— Resorts Near City Well Filled.

It was noon in Fifth Avenue and the sidewalks were a bright medley of color yesterday as an unbroken stream of glinting automobiles moved in the sunshine. The churches were letting out. Faint organ notes echoed from the dim interiors, banked with blossoms and fragrant with the perfume of lilies.

Modern, prosperous New York was celebrating Easter. The models of the machines were 1929. The fashions on display were those of the future. A group of young women, who said they were smashing a tradition and not favoring any particular brand, strolled along the lane between the tiered skyscrapers and puffed cigarettes.

One Fleeting Note of the Past.

New York Times, April 1, 1929: the “Freedom” cigarette report

WHAT WE KNOW

Women already smoked at home and in some public places before 1929. The stunt’s own effect was never measured.

HOW WE KNOW

Historical accounts; no study measured the stunt’s impact.

Women in War Jobs

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Factory work was seen as men’s work
NEW INVITATION	Women could fill essential wartime jobs

HOW THEY BUILT IT

01 Wartime advertisers connected industrial work to national service.

02 Posters and other mass advertising made women workers visible.

03 Women took factory and shipyard jobs; federal child care came in 1943 and reached only some.

'Do the job HE left behind' poster, c. 1943 — National Archives

WHAT WE KNOW

About six million women entered U.S. work during World War II. The ads’ share of that change is unknown.

HOW WE KNOW

Workforce records; no test of the ads.

Smokey Bear

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Wildfires felt like someone else's problem
NEW INVITATION	Each visitor had a part in preventing fires

HOW THEY BUILT IT

01 The Forest Service and ad partners created one recurring bear character.

02 Posters began in 1944; the "Only You" line came in 1947, then radio and TV spots.

03 Materials paired the memorable character with specific fire-safety advice.

First Smokey Bear poster, 1944 — USDA Forest Service / National Archives

WHAT WE KNOW

The message has endured since 1944. The sources reviewed do not show how many fires it prevented.

HOW WE KNOW

Campaign history; other causes of change were not ruled out.

“Crying Indian” anti-litter campaign

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Protesters blamed industry for throwaway packaging
NEW INVITATION	Individuals were urged to feel personally responsible

HOW THEY BUILT IT

01 Keep America Beautiful built an emotional TV spot around a single visual story.

02 The closing tear and “People start pollution. People can stop it” put the blame on individuals.

03 It ended with a mail-in offer for “71 things you can do”; stations aired it until prints wore out.

“Crying Indian” TV spot, 1971 — Keep America Beautiful

WHAT WE KNOW

The ad became famous. Its sponsors later credited it with an 88% litter drop, citing no study.

HOW WE KNOW

Campaign history; no clear behavior test.

Ven conmigo

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Adult classes could feel out of reach
NEW INVITATION	Enrolling to learn to read could feel possible

HOW THEY BUILT IT

01 A television drama followed characters confronting adult illiteracy.

02 Scenes presented study and enrollment as choices ordinary adults could make.

03 Episodes told viewers where to sign up for government literacy classes and how to get a booklet.

WHAT WE KNOW

About 840,000 people enrolled in adult education during its broadcast year, far more than the year before.

HOW WE KNOW

Enrollment records before and after; other causes possible.

Acompáñame

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Family planning was hard to discuss
NEW INVITATION	Spouses could discuss and seek it

HOW THEY BUILT IT

01 A daily drama followed three sisters; the one with ten unplanned children fell into poverty.

02 Characters modeled conversations about contraception and family size.

03 Episode epilogues gave advice about family-planning services; calls to the population council rose.

Acompáñame title card, 1977 — Televisa

WHAT WE KNOW

Family-planning clinic use rose during the broadcast year, but a small viewer study found no clear change in contraceptive use.

HOW WE KNOW

Clinic records and a viewer survey gave mixed results.

Drunk Driving Prevention

THE CHANGE THEY SOUGHT

OLD EXPECTATION	A friend's drive home was their own decision
NEW INVITATION	A friend should step in before they drive

HOW THEY BUILT IT

01 The campaign made intervention a test of friendship, not a lecture about alcohol.

02 In 1990 new ads introduced "Friends Don't Let Friends Drive Drunk," the campaign's best-known line.

03 The ask was concrete: step in and keep a friend who has been drinking from taking the wheel.

"Crashing Glasses" PSA, 1983 — Ad Council / U.S. DOT

WHAT WE KNOW

More than two in three Americans say they have tried to stop someone from driving after drinking.

HOW WE KNOW

Ad Council-reported self-report figure; campaign's share cannot be isolated.

Hum Log

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Family and gender expectations went unquestioned
NEW INVITATION	Viewers could imagine different choices

HOW THEY BUILT IT

01 A long-running TV family supplied characters with different beliefs and choices.

02 Viewers followed consequences over time, rather than hearing one stand-alone message.

03 Some independent women were punished by the plot, undercutting the intended lesson.

Hum Log, episode 1, 1984 — Doordarshan

WHAT WE KNOW

Survey results were mixed: heavier viewers held more pro-equality views, but a fuller model found no sign the show shifted them.

HOW WE KNOW

Survey of 1,170 people; viewing was not assigned by chance.

Vince and Larry

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Skipping a seat belt seemed routine
NEW INVITATION	Buckling up became the obvious move

HOW THEY BUILT IT

01 Two crash-test dummy characters made the safety warning funny.

02 Short spots repeated the crash consequence and the buckle-up instruction.

03 The same characters stayed recognizable across years of ads and merchandise.

Vince and Larry seat-belt PSA, 1990s — NHTSA / Ad Council

WHAT WE KNOW

Seat-belt use rose over decades, but laws and enforcement changed too. The ads' share is unclear.

HOW WE KNOW

National trend; campaign effect not isolated.

Don’t Mess with Texas

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Roadside litter was tolerated
NEW INVITATION	Littering offended Texas pride

HOW THEY BUILT IT

01 The first ad used Texas musician Stevie Ray Vaughan and a state-pride slogan.

02 It debuted on the Cotton Bowl screen on Jan. 1, 1986, then continued as TV and radio spots.

03 Later famous Texans and public cleanup events kept the message visible.

First Don’t mess with Texas spot, 1986 — TxDOT

WHAT WE KNOW

In a 2013 Texas survey, 98% recognized the slogan. That measures reach, not less litter.

HOW WE KNOW

State survey of awareness.

Designated Driver

THE CHANGE THEY SOUGHT

OLD EXPECTATION	A drinking group might leave driving undecided
NEW INVITATION	The group chose a sober driver in advance

HOW THEY BUILT IT

01 Harvard defined one small role: take turns being the person who does not drink.

02 Staff met 250 Hollywood people; scenes and lines entered more than 160 prime-time programs.

03 Three networks reinforced the role with ads; publicity and partners repeated it.

“Life of the Party” poster on the Cheers set, c. 1989 — Harvard Chan CHC

WHAT WE KNOW

By 1991, 37% of Americans said they had served as a designated driver (Roper poll).

HOW WE KNOW

National poll; other causes of change were not ruled out.

Designated Driver

"Choose a Designated Driver" CBS PSA, 1989 — CBS (VHS archive)

THE OPERATING CHAIN

BEHAVIOR

Choose one non-drinker before the group goes out; rotate the role on later nights.

ACCESS

Harvard spent 25 workweeks meeting 250 Hollywood people; Grant Tinker helped open doors.

REPETITION

More than 160 prime-time programs addressed drunk driving over four years; ABC, CBS, and NBC aired ads.

REINFORCEMENT

News coverage, sports leagues, NHTSA, MADD, and local police repeated the same idea.

DESIGN LESSON

A tiny, repeatable role can spread through existing stories when creators can include it in one line.

Operation Breakthrough

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Friends might avoid an eating-disorder concern
NEW INVITATION	Friends could notice and offer help

HOW THEY BUILT IT

01 Harvard's health-communication center worked with the producers of popular teen shows.

02 Eating-disorder plots put a friend's response inside familiar characters' lives.

03 In Blossom, the heroine sends a friend she suspects has an eating disorder to a former bulimic.

Beverly Hills, 90210 diet-pill storyline, 1993 — CBS

WHAT WE KNOW

90210 began the storyline March 24, 1993; Blossom's "Hunger" aired May 10, 1993. Viewer helping was not measured.

HOW WE KNOW

Campaign record; behavior not measured.

Meena

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Girls' exclusion from school seemed ordinary
NEW INVITATION	A girl could insist on equal opportunity

HOW THEY BUILT IT

01 UNICEF asked more than 10,000 children about the heroine's look and life.

02 A recurring animated girl faced school and family obstacles in story form.

03 TV films expanded into radio, comics, books, and discussion materials.

Meena at the school window, "Count Your Chickens" — UNICEF

WHAT WE KNOW

In Bangladesh, 97% of urban and 81% of rural children and adolescents recognized Meena.

HOW WE KNOW

Recognition survey; this does not prove behavior changed.

Twende na Wakati

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Family planning was difficult to raise
NEW INVITATION	Couples could discuss and use it

HOW THEY BUILT IT

01 A continuing radio drama gave listeners characters to follow over time.

02 Storylines tackled family planning and HIV; listeners then talked more with spouses about it.

03 Dodoma aired other programs from 1993 to 1995, giving the study a comparison area.

Effects of an Entertainment-education Radio Soap Opera on Family Planning Behavior in Tanzania

Everett M. Rogers, Peter W. Vaughan, Ramadhan M.A. Swalehe, Nagesh Rao, Peer Svenkerud, and Suruchi Sood

An entertainment-education radio soap opera introduced in Tanzania in 1993 was evaluated by means of a field experimental design in which the radio program was broadcast by seven mainland stations of Radio Tanzania. An eighth station broadcast alternative programming from 1993 to 1995, its listenership serving as a comparison area in which contemporaneous changes in family planning adoption were measured. The soap opera was subsequently broadcast nationwide from 1995 to 1997. Data about the effects of the radio soap opera were gathered in five annual surveys of about 2,750 households in the comparison and the treatment areas and from a sample of new family planning adopters in 79 health clinics. The soap opera had strong behavioral effects on family planning adoption; it increased listeners' self-efficacy regarding family planning adoption and influenced listeners to talk with their spouses and peers about contraception. (Studies in Family Planning 1999; 30[3]: 193–211)

Rogers et al. evaluation, Studies in Family Planning, 1999

WHAT WE KNOW

Married women using family planning rose 10 points where it aired and fell 11 in the comparison area, 1993–95.

HOW WE KNOW

Areas compared over time; other differences may matter.

Click It or Ticket

THE CHANGE THEY SOUGHT

OLD EXPECTATION	A seat belt could feel optional
NEW INVITATION	Unbelted driving could bring a ticket

HOW THEY BUILT IT

01 Publicity announced the enforcement itself: buckle up or get a ticket.

02 In 1993, eight weeks of paid ads backed checkpoints in 100 counties; a second wave followed in 1994.

03 First 3 weeks: about 3,000 checkpoints, 22,000 citations. Both waves: 6,364 and 58,883.

Click It or Ticket TV spot, 2003 — NHTSA

WHAT WE KNOW

In North Carolina, observed driver belt use rose from 64% before the program to 80% in Nov. 1993 and 81% by Aug. 1994.

HOW WE KNOW

Before-after roadside counts; publicity and enforcement ran together.

Click It or Ticket

Click It or Ticket end card, 2003 — NHTSA

THE OPERATING CHAIN

PROMISE

Ads announced the plain consequence: an unbelted driver could get a ticket.

TIMING

North Carolina paid for eight weeks of ads in 1993; a second wave ran in July 1994.

DELIVERY

About 3,000 checkpoints in 100 counties in three weeks; 6,364 across both waves.

PROOF

About 22,000 belt citations in the first three weeks; 58,883 across both waves.

DESIGN LESSON

The message worked as an announcement of a real, coordinated enforcement action.

SOURCES clickitorticket.org · iihs.org · web.archive.org

Squash It!

THE CHANGE THEY SOUGHT

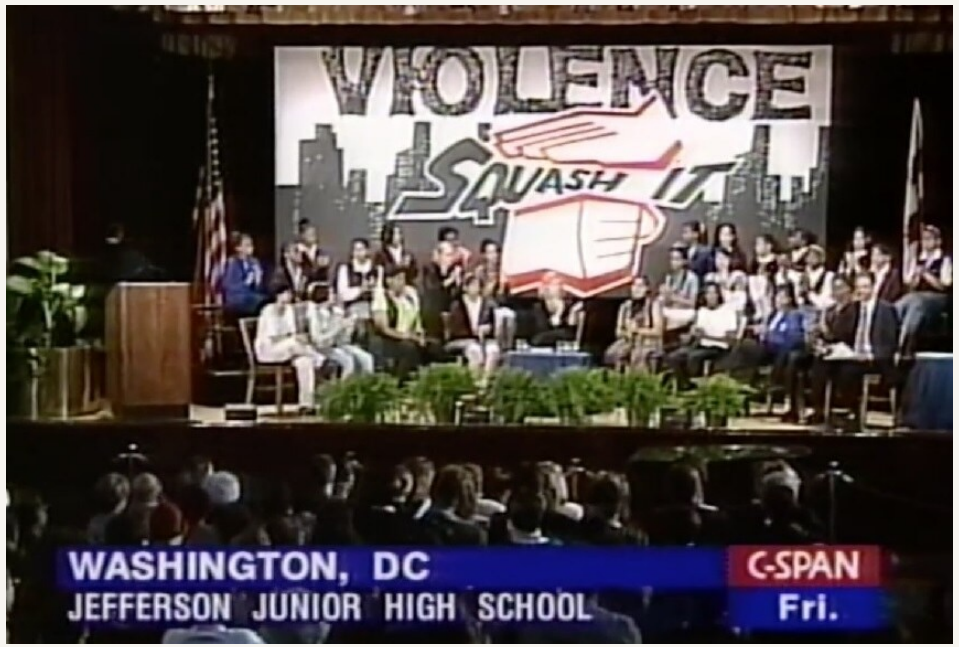

OLD EXPECTATION	Teens thought peers expected a fight, not a walk-away
NEW INVITATION	Walking away could show control

HOW THEY BUILT IT

01 Harvard built on “squash it,” a phrase Black teens already used for walking away.

02 Producers of nine TV series, including ER and 90210, worked the message into scripts.

03 MTV artists and sports figures repeated the phrase in short ads.

Squash It! forum stage, C-SPAN, 1997 — Harvard Chan CHC

WHAT WE KNOW

In surveys, use of “squash it” to avoid a fight rose from 48% to 60% among Black youth.

HOW WE KNOW

Harvard surveys, 1995 vs. 1997; no comparison group; many other efforts ran too.

Soul City

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Partner violence could be dismissed as private
NEW INVITATION	Neighbors could recognize and oppose it

HOW THEY BUILT IT

01 Season four's 13-part TV drama followed Matlakala as her husband turned abusive.

02 Radio, print, and community events carried the topic beyond TV.

03 A network of 1,500+ activists and groups marched and pressed to enact the Domestic Violence Act.

1999 press coverage of the Matlakala story and an anti-violence march — Soul City 4 evaluation

WHAT WE KNOW

After season four, more people said domestic violence should not be treated as a private matter: 56% rose to 66%.

HOW WE KNOW

Before-and-after survey; other causes possible.

SOURCES soulcity.org.za · web.archive.org

Following ER

THE CHANGE THEY SOUGHT

OLD EXPECTATION	A fictional health plot ended with the episode
NEW INVITATION	Viewers could connect it to real information

HOW THEY BUILT IT

01 90-second health news segments ran on NBC stations right after ER.

02 Each segment took up the medical issue shown in that night's episode.

03 Segments told viewers how to prevent it and where to get more information.

ER cast promotional image, mid-1990s — NBC

WHAT WE KNOW

In a test with 458 jurors, an ER tie-in raised attention to a familiar health story but not a novel one.

HOW WE KNOW

Viewers were assigned by chance; health behavior was not tested.

Tostan public declarations

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Families expected female genital cutting to continue
NEW INVITATION	Linked villages could agree to stop together

HOW THEY BUILT IT

01 Community education and discussion came before any declaration.

02 Villages connected through marriage spoke with one another before committing.

03 A public ceremony made the shared decision visible and reduced fear of acting alone.

Public declaration march, Mbour, Senegal, 2011 — Tostan

WHAT WE KNOW

Cutting fell by more than half in participating villages over nearly a decade.

HOW WE KNOW

UNICEF 2008 study vs. comparison villages; not randomized; starting rates differed.

Tostan public declarations

Community meeting, Keur Simbara, Senegal, 2013 — DFID (CC BY 2.0)

THE OPERATING CHAIN

PREPARE

Community education gave people time to discuss health, rights, and the practice.

CONNECT

Villages linked through marriage met before making a joint commitment.

DECLARE

Representatives announced the collective decision in public.

SUSTAIN

The public commitment signaled that families would not have to act alone.

DESIGN LESSON

A declaration becomes useful after the connected groups have reached the same decision.

SOURCES tostan.org · excisionparlonsen.org

Rap-It-Up

THE CHANGE THEY SOUGHT

OLD EXPECTATION	HIV questions could stay unspoken
NEW INVITATION	Young viewers could ask and seek testing

HOW THEY BUILT IT

01 BET carried messages through entertainment and short announcements.

02 Kaiser and BET co-produced HIV messages aimed at Black viewers.

03 Ads pointed to a free phone line and website with testing-center information.

Rap-It-Up PSA with hotline number, early 2000s — BET/KFF

WHAT WE KNOW

In a survey, 84% of young Black adults had seen some part of the BET campaign.

HOW WE KNOW

Audience survey; reach, not behavior change.

truth

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Smoking could signal independence
NEW INVITATION	Rejecting tobacco could signal independence

HOW THEY BUILT IT

01 Youth-oriented ads exposed the tobacco industry's conduct.

02 One brand voice, not adult warnings, cast rejecting tobacco as independence.

03 The campaign kept evolving: new ads, a website, events, and summer tours.

'Body Bags' truth TV spot, 2000 - American Legacy Foundation

WHAT WE KNOW

By 2002, researchers estimated about 300,000 fewer youth smokers than there would have been without truth.

HOW WE KNOW

Estimate linking school survey trends to ad exposure by market; not a trial.

Sexto Sentido

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Sensitive topics stayed private
NEW INVITATION	Young people could talk and seek help

HOW THEY BUILT IT

01 A weekly TV soap wove storylines on sexuality, gender violence, and HIV.

02 A nightly youth call-in radio show and local youth training took the TV issues further.

03 The program sought discussion and service use, not viewing alone.

Sexto Sentido cast, c. 2001-05 - Puntos de Encuentro

WHAT WE KNOW

Youth who watched more talked more about HIV and violence, and were 48% likelier to seek help for violence.

HOW WE KNOW

Same youth surveyed yearly, 2003-05; heavier viewers may have been predisposed.

VERB

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Activity messages leaned on health facts
NEW INVITATION	Children could find an activity they enjoyed

HOW THEY BUILT IT

01 The CDC asked 9- to 13-year-olds to discover activities they liked: “VERB. It’s what you do.”

02 Children tested ads; paid placements reached them on TV, radio, and in print.

03 Parents and local programs were enlisted to make activity easier to try.

'Hip-Hop Scotch' VERB print ad, 2003 - CDC

WHAT WE KNOW

After one year, 9- and 10-year-olds aware of VERB reported 34% more free-time activity sessions a week than unaware peers.

HOW WE KNOW

Same children surveyed 2002 and 2003; aware vs. unaware; self-reported.

KNOW HIV/AIDS

THE CHANGE THEY SOUGHT

OLD EXPECTATION	HIV messages sat in scattered, separate channels
NEW INVITATION	People could find information and testing advice

HOW THEY BUILT IT

01 Kaiser supplied health expertise; Viacom, including CBS, supplied creative reach.

02 Ads ran across TV, radio, outdoor, online, and print properties.

03 Entertainment plots and a free guide added context and next-step information.

'Meet the new face of HIV' KNOW HIV/AIDS poster, 2003 - KFF/Viacom

WHAT WE KNOW

Viacom committed over $120 million in first-year ad placements; KFF records report reach, not a change in testing.

HOW WE KNOW

Campaign record; behavior effect not established.

SOURCES kff.org

SASA!

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Partner violence could be accepted or ignored
NEW INVITATION	Neighbors could question and act on it

HOW THEY BUILT IT

01 Local residents were selected, trained, and supported as activists.

02 In Awareness, activists got neighbors questioning men's power over women where they gathered.

03 Support built help for people changing; Action had them try and celebrate new behavior.

SASA! Awareness Power Poster, 2008 - Raising Voices

WHAT WE KNOW

Women in participating communities were about half as likely to say partner violence was acceptable.

HOW WE KNOW

8 communities randomized; the 52% drop in physical violence was not significant.

SASA!

SASA! Action Community Poster, 2008 - Raising Voices

THE OPERATING CHAIN

START

Staff mapped the community and recruited local women and men as activists.

AWARENESS

Activists raised questions about power through familiar, informal conversations.

SUPPORT

Neighbors built skills and ties to support people who were changing.

ACTION

People practiced and publicly recognized changed behavior.

DESIGN LESSON

Change moved through sustained, phased activism in local networks, not one-off messages.

Opower Home Energy Reports

THE CHANGE THEY SOUGHT

OLD EXPECTATION Households likely misjudged their use vs. neighbors

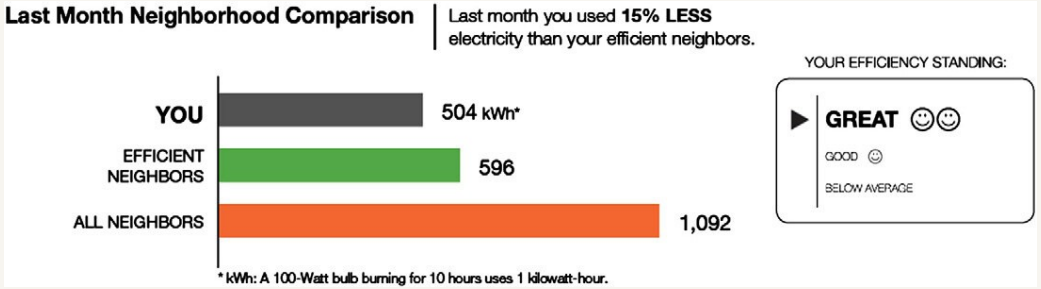

NEW INVITATION Neighbors' use made saving concrete

HOW THEY BUILT IT

01 OPOWER built each report from the home's own meter reads and mailed it for the utility.

02 A bar chart compared the home with about 100 similar nearby homes and the most efficient 20%.

03 Each report paired comparison with practical ways to save energy.

Home Energy Report comparison, c. 2009 — OPOWER via Allcott 2011

WHAT WE KNOW

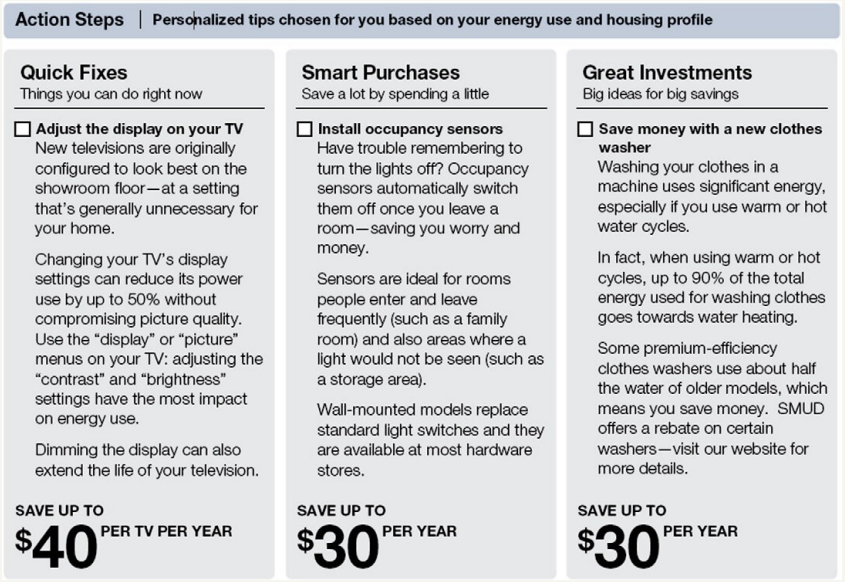

Households sent the reports used about 2% less electricity on average.

HOW WE KNOW

Nearly 600,000 households randomly assigned across 17 experiments.

SOURCES nber.org · eml.berkeley.edu

Opower Home Energy Reports

Action Steps | Personalized tips chosen for you based on your energy use and housing profile

Quick Fixes
Things you can do right now

☐ **Adjust the display on your TV**
New televisions are originally configured to look best on the showroom floor—at a setting that's generally unnecessary for your home.

Changing your TV's display settings can reduce its power use by up to 50% without compromising picture quality. Use the "display" or "picture" menus on your TV: adjusting the "contrast" and "brightness" settings have the most impact on energy use.

Dimming the display can also extend the life of your television.

SAVE UP TO **$40** PER TV PER YEAR

Smart Purchases
Save a lot by spending a little

☐ **Install occupancy sensors**
Have trouble remembering to turn the lights off? Occupancy sensors automatically switch them off once you leave a room—saving you worry and money.

Sensors are ideal for rooms people enter and leave frequently (such as a family room) and also areas where a light would not be seen (such as a storage area).

Wall-mounted models replace standard light switches and they are available at most hardware stores.

SAVE UP TO **$30** PER YEAR

Great Investments
Big ideas for big savings

☐ **Save money with a new clothes washer**
Washing your clothes in a machine uses significant energy, especially if you use warm or hot water cycles.

In fact, when using warm or hot cycles, up to 90% of the total energy used for washing clothes goes towards water heating.

Some premium-efficiency clothes washers use about half the water of older models, which means you save money. SMUD offers a rebate on certain washers—visit our website for more details.

SAVE UP TO **$30** PER YEAR

Home Energy Report action steps, c. 2009 — OPOWER via Allcott 2011

THE OPERATING CHAIN

DATA

Utilities sent each household's meter reads to OPOWER.

COMPARISON

Mailed reports showed the home beside similar nearby homes.

GUIDANCE

The same report offered tips matched to the home's past use.

FEEDBACK

Reports repeated monthly to quarterly, so households saw their use again.

DESIGN LESSON

Pair the comparison with practical steps; Allcott credits the tips with keeping low users from using more.

Kyunki... Jeena Issi Ka Naam Hai

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Health advice felt separate from family life
NEW INVITATION	Families could see care practices in stories

HOW THEY BUILT IT

01 UNICEF's Facts for Life health messages were written into recurring village storylines.

02 Doordarshan aired it in prime time; its primary audience was women aged 15 to 34.

03 Frontline health workers, including nurse Savita, were lead characters viewers discussed.

Nurse Savita viewer postcard, 2008–11 — UNICEF India

WHAT WE KNOW

UNICEF reported 145 million viewers and increased health knowledge among women.

HOW WE KNOW

UNICEF-commissioned pre-post surveys vs. non-viewers; not randomized.

SOURCES web.archive.org · global.comminit.com

MTV Shuga

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Few young Nigerians had recently tested for HIV
NEW INVITATION	Young characters made the choices familiar

HOW THEY BUILT IT

01 The Nigerian season built HIV testing and stigma into its main characters' stories.

02 Eight 22-minute episodes starred prominent Nigerian actors and musicians.

03 After the study, writers were urged to put key messages in main plots, not side plots.

Shuga Naija ep. 3 HIV-test clinic scene, 2013 — MTV Staying Alive

WHAT WE KNOW

Young adults assigned to watch were more likely to get an HIV test; fewer women tested positive for chlamydia.

HOW WE KNOW

80 Nigerian screening sites randomly assigned to Shuga or a non-health drama.

MTV Shuga

Shuga Naija helpline end card, 2013 — MTV Staying Alive

THE OPERATING CHAIN

STORY

The Nigerian season used eight short episodes about testing, stigma, and relationships.

CHARACTERS

Choices and consequences unfolded through young people viewers could recognize.

TEST

Randomly assigned sites showed Shuga or Gidi Up, a youth drama with no health content.

REVISE

Later writers were urged to move health messages from side plots into main plots.

DESIGN LESSON

The desired choice needs to matter to the main story, not just appear in the background.

SOURCES shuga.tv · povertyactionlab.org · nber.org

East Los High

THE CHANGE THEY SOUGHT

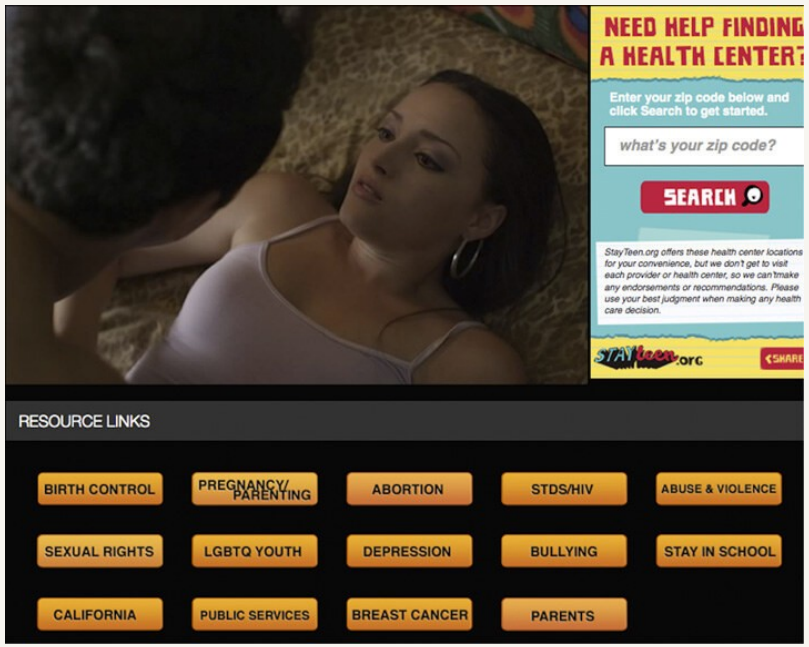

OLD EXPECTATION	Few sexual-health programs spoke to Latino teens
NEW INVITATION	Teens could follow a character to real help

HOW THEY BUILT IT

01 A 24-episode Hulu drama built a continuing teen story.

02 Character vlogs, extended scenes, and social media posts continued the plot online.

03 The show site linked viewers to clinic-finding and other health resources.

East Los High site with clinic finder, 2013 — via AJPH 2016

WHAT WE KNOW

In a small lab test, the version with online extras raised condom knowledge most. Behavior change was not shown.

HOW WE KNOW

136 young Latinas randomly assigned to five formats; two-week follow-up.

SOURCES populationmedia.org · utminers.utep.edu

East Los High

East Los High website home page, 2013 — via AJPH 2016

THE OPERATING CHAIN

STORY

A 24-episode Hulu season made teen health part of a continuing drama.

FOLLOW

Episode endings directed viewers to the show website.

EXTEND

Character vlogs and extended scenes continued the fictional world online.

ACT

The site linked viewers to information and tools for finding health services.

DESIGN LESSON

A companion site can route interest in a character to real clinic-finding tools.

Main Kuch Bhi Kar Sakti Hoon

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Women's health choices were constrained by expectation
NEW INVITATION	A trusted character could challenge them

HOW THEY BUILT IT

01 Dr. Sneha returned to her village as a recurring woman doctor.

02 Doordarshan aired it on TV; an adapted radio version ran on 216 All India Radio stations.

03 A toll-free missed-call line let viewers hear content and record their own responses.

Dr. Sneha, MKBKSH S1 Ep. 1, 2014 — Population Foundation of India

WHAT WE KNOW

Seasons 1–2 drew 1.7 million calls. In a 2019 village study, viewers' toilet ownership rose 16 points; non-viewers' 3.5, not significantly.

HOW WE KNOW

13 viewer vs. 10 non-viewer villages, not randomized; baselines differed.

Ouro Negro

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Child marriage could go undiscussed
NEW INVITATION	Listeners could question it together

HOW THEY BUILT IT

01 A continuing national radio drama created characters and repeated exposure.

02 Live local-language call-in shows invited questions and public conversation.

03 Community theater in local languages took the stories to live audiences.

Ouro Negro series artwork, 2016 — PCI Media Impact

WHAT WE KNOW

After one year, only 206 of 1,910 panel respondents had listened, limiting what the study could show.

HOW WE KNOW

Pre/post panel survey of 1,910 women plus focus groups (first year).

This Girl Can

THE CHANGE THEY SOUGHT

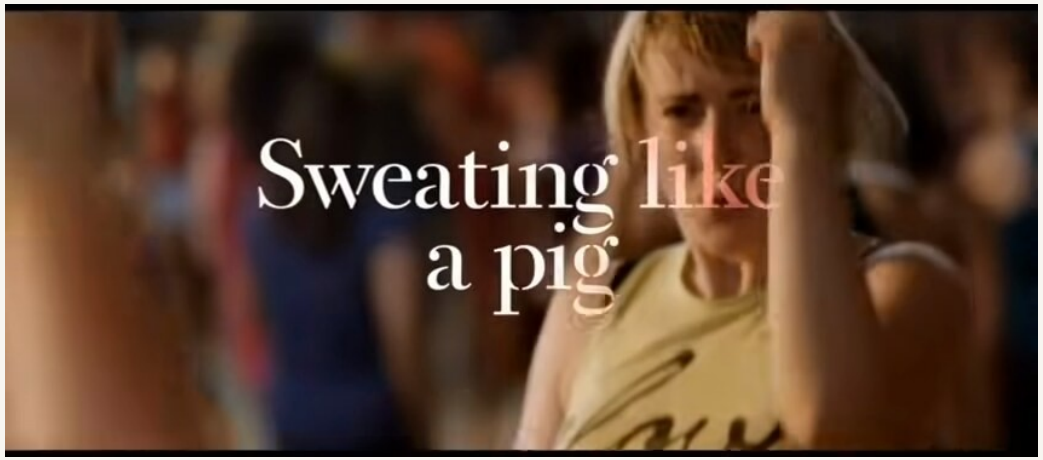

OLD EXPECTATION	Fear of judgment held women back from activity
NEW INVITATION	Women could move without looking a certain way

HOW THEY BUILT IT

01 Research identified fear of judgment as the key barrier.

02 Ads showed real women sweating and moving at different ability levels.

03 TV, cinema, outdoor ads, and social sharing made those images public.

'This Girl Can' TV ad frame, 2015 — Sport England

WHAT WE KNOW

2.8 million women aged 14–40 who recognized the campaign said they did more activity as a result.

HOW WE KNOW

TNS/BMRB survey self-reports scaled to England; no comparison group.

SOURCES sportengland.org · assets.publishing.service.gov.uk

Icchedana

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Girls' sport and ambition faced family limits
NEW INVITATION	Friends and families could back girls' plans

HOW THEY BUILT IT

01 A 26-episode drama followed Tanzila and an all-girls football team.

02 Recurring conflicts made child marriage and school decisions concrete.

03 Two ministries, UNICEF, and UNFPA launched it alongside other adolescent media programs.

Icchedana poster — UNICEF Bangladesh / Asiatic MCL

WHAT WE KNOW

A survey after season one found viewers knew more about child marriage's harms; more boys and fathers discussed it.

HOW WE KNOW

Pre/post panel survey; a weak baseline limits causal claims.

SOURCES unicef.org

Vencer el Miedo

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Parents and teens avoided sexual-health talks
NEW INVITATION	They could speak and seek advice

HOW THEY BUILT IT

01 A 47-episode drama showed teens and parents reconsidering choices.

02 A technical advisory group checked the scripts for medical accuracy.

03 A cast message after each episode gave a counseling hotline number.

Vencer el Miedo cast still, 2020 — Televisa / PMC

WHAT WE KNOW

Teen viewers more often reported non-condom and dual contraception; parent viewers talked more with teens about sex.

HOW WE KNOW

Cross-sectional survey of viewers vs. nonviewers; cannot show causation.

Rope Guna Fal

THE CHANGE THEY SOUGHT

OLD EXPECTATION	Child marriage felt like a family default
NEW INVITATION	Families could question and stop it

HOW THEY BUILT IT

01 PMC-trained local writers built characters who change across 104 radio episodes.

02 Radio Nepal, 100+ local stations, and an offline phone line carried episodes.

03 The national series ran for a year, with attention to three target provinces.

Rope Guna Fal recording session, c. 2022 — Population Media Center

WHAT WE KNOW

Listeners had about 3.8 times the odds of nonlisteners of reporting action against child marriage.

HOW WE KNOW

Cross-sectional survey; only 44 of 2,083 respondents were listeners.

APPENDIX

Sources and fact-check trail

The following slides list every source link for each case, in deck order, with the slide numbers it supports.

Each case slide’s speaker notes list every claim on that slide, its check result, the supporting passage quoted from the source, and the link.

Verdicts: VERIFIED (source supports the wording), CORRECTED (a fact was wrong and was fixed), SOFTENED (wording was stronger than the source and was narrowed), REMOVED (unsupported and replaced).

Image credits follow the source list. factcheck.json in the handoff folder holds the same records in machine-readable form.
